What is it?

COVID-19 has brought on so many changes, concerns and added stresses to our families in addition to the trauma of sexual abuse. That is why keeping our care closet full and accessible right now is so important!

Cora's Care Closet meets the emergency needs of the children and non-offending family members that our center serves. We provide immediate access to **brand new** clothing, hygiene products, home cleaning supplies, baby items, furniture and more, ***completely free of charge.***

We only accept **new never used items**. We strongly believe in the motto that **used and abused children, do not deserve used and abused things.**

Children who are removed or forced from their homes because of abuse or neglect often leave with nothing but the clothes on their backs. Caregivers may be struggling to meet the new and unexpected needs of a child in crisis. Cora's Care Closet and the team at The Children's Advocacy Center is here to help ensure safer environments and stabilized placements for our clients and their families.
