Space is limited. Masks required.

## OBJECTIVES

Identify the 8 sensory systems and  
their functions

Gain a basic understanding of  
how disordered sensory  
processing presents in children

Identify behaviors that relate to  
each sensory system and how  
they affect a child's daily life

Instruction in strategies to  
implement to improve a child's  
participation in daily activities in  
the home and community

How occupational therapy can  
help manage behavioral and  
sensory processing problems
