

Event Support

Event Support

Putting on a Count on Kids community service event is extremely rewarding! There are many pieces that go into an event. Support in any of these areas is much needed;

- **Planning / Pre-event**
 - Coming up with a community service project idea
 - Identifying potential nonprofits that could benefit from our projects
 - Sourcing location
 - Sourcing and prepping supplies
- **During the Event**
 - Set up of event equipment and supplies
 - Greeting of families and validation of registration
 - Support of families and children during the service project (this may include things like explaining the project and/or ensuring they have all the materials they need to complete it). Projects range of artwork/crafts to park cleanups)
 - Socializing with caregivers to obtain feedback on event and organization
- **Post event**
 - Collect project stats. For example, 1) how many meal placemats got decorated 2) how many decorated cards were made, 3) how many art therapy bags were assembled?
 - Tear down and clean-up of event equipment and supplies
 - Delivery of projects to selected nonprofits
- **EXPO Type Events:**
 - These events are simple and only require a few people to “staff” a booth and provide information on Count on Kids. Easy Peasy!
