

# Sanitation Protocols for Volunteer Drivers

**Maintain at least 6 ft distance**, ideally 10 feet of distance, from everyone you see: volunteer coordinators, food recipients, other volunteers, etc.

**Clean hands and sanitize** your phone, car handles, and steering wheel before arriving for your volunteer slot. We have gloves available upon request.

**Wear a mask** for your entire volunteer slot. If you need to touch it or adjust it while by yourself, use hand sanitizer/remove your gloves.

**Load food boxes into your vehicle** without assistance from people not in your household.

**!** THIS IS DIFFERENT FROM FOOD4LIFE GUIDELINES. It is difficult to maintain social distancing if multiple people are loading/unloading, and we also aim to minimize contact with boxes in short periods of time.

**Place boxes at the front door** of the delivery address, knock, stand 6 feet away and WAIT for someone to answer the door.

**!** THIS IS DIFFERENT FROM FOOD4LIFE GUIDELINES. Because we supply recipients with perishable items of food, it is very important that you visually confirm a recipient has received the food.
