

# COVID-19: Post-Vaccination Symptom Management

This protocol is for management of symptoms occurring within 2 days after receiving the COVID-19 vaccine. Symptoms occurring more than 2 days after receiving the vaccine will be managed per the standard OHS COVID-19 protocol.

## Symptoms unlikely to be from vaccine

- Cough
- Shortness of breath
- Upper respiratory symptoms (e.g., runny nose, congestion, sore throat)
- Loss of sense of smell or taste

- Contact OHS if you experience these symptoms at (734) 764-8021

## Symptoms that could be from vaccine or COVID-19

- Fever ( $T > 100.4^{\circ}\text{F}$  or  $38^{\circ}\text{C}$ )
- Chills
- Muscle aches
- Headache

- Follow usual protocols and guidance from the EUA Fact Sheet for side effects
- Employee may work if afebrile and feeling well enough
- If you have questions, visit <https://hr.umich.edu/benefits-wellness/health-well-being/occupational-health-services>
- If questions remain, e-mail [OHS-covidvaccine@med.umich.edu](mailto:OHS-covidvaccine@med.umich.edu)
- If you still have unanswered questions, call (734) 764-8021

## Symptoms consistent with vaccine-related side effects only

- Local symptoms (e.g., pain, swelling, redness at injection site)
- Immediate hypersensitivity reaction (e.g., hives, anaphylaxis)
